Understanding Your Yard and Garden... *Before* You Dig into It!

**BASIC SUSTAINABLE DESIGN
KNOW-HOW
PART ONE**

11:00AM

What are the sunlight exposure elements of your yard?

Hot Sun - full south

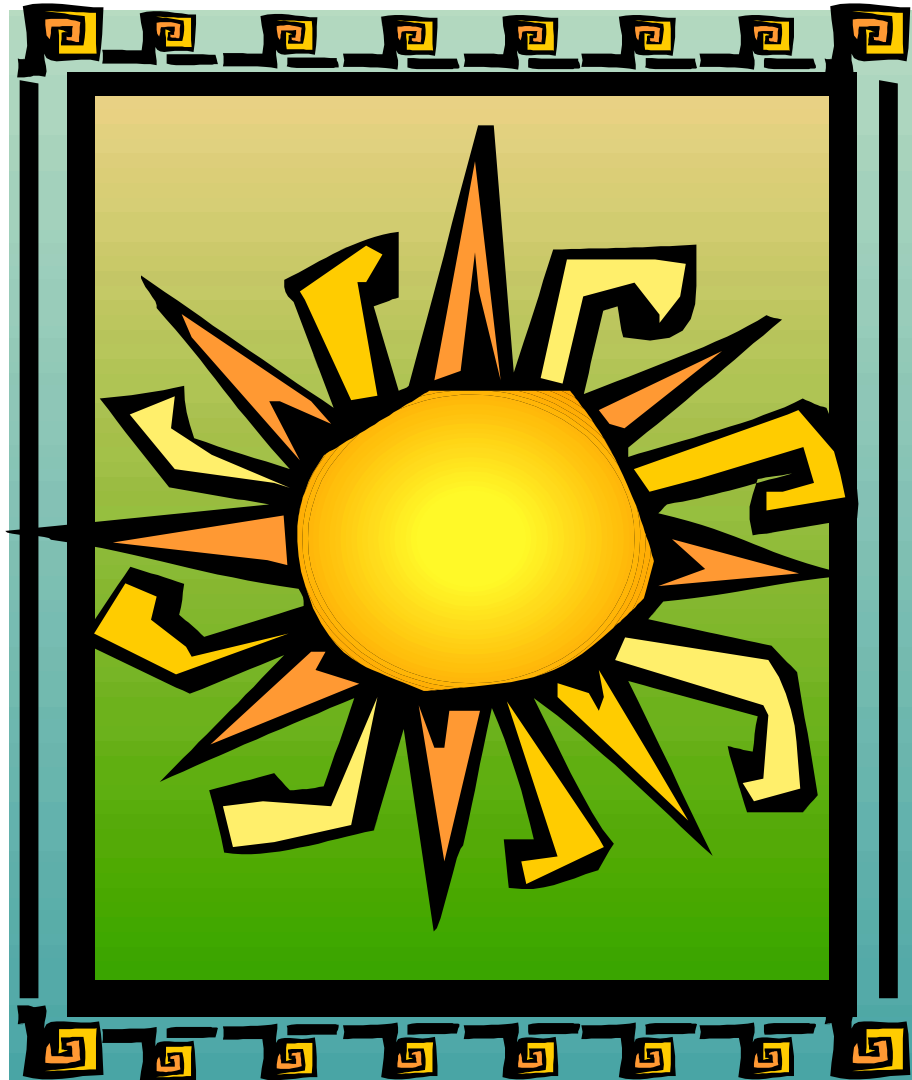

Full Sun - the compass

Part Sun - always moving

Part Shade - dappled

Shade - woodland

Full Shade - darkness

What kind of short and long term moisture conditions do you have?

Rain (and the water it gives) can be fast or slow, long and short, gentle or punishing

Your municipal water is for drinking, not irrigating!

What are the opportunities for moisture? (also see part two)

What is the soil structure of your yard?

What is near your house?

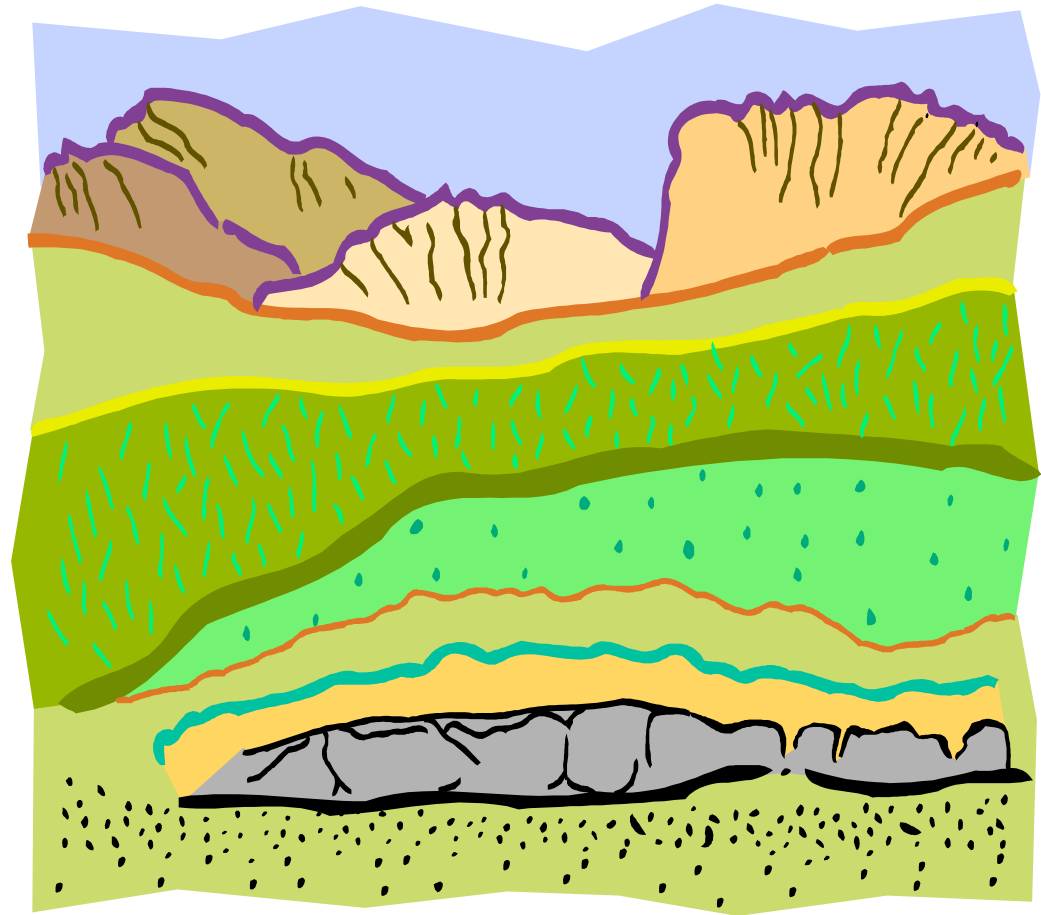

- construction woes

What is far from your house?

- tree roots

How do you maintain your soil?

- compost, leaves, covers

What is happening at your house?
