

HUMMINGBIRD DELIGHTS

Hummingbirds are said to have a special fondness for red, but they will feed on a variety of nectar producing flowers. If you just have a small space, like a sunny corner spot why not try planting just a few perennials to attract the hummers. Another option is some hanging baskets with annuals near a window that you can watch the hummingbirds from.

ANNUALS THAT ATTRACT HUMMINGBIRDS

- Begonia
- Red Impatience
- Snapdragons
- Nicotiana
- Fuchsia
