

Rose

FAVORITES

If you have a garden with at least 6 hours of sun and well-drained soil you can plant beautiful, romantic roses. The non-grafted shrub roses are hardier and more disease resistant than other cultivars. Canadian bred and developed roses come in a variety of colors and sizes, including several climbing varieties.

CANADIAN ARTIST SERIES

The Canadian Artist Series roses were developed by a consortium of Canadian rose growers and breeders. Named for Canadian artists, the roses in this series are winter hardy across Canada and are also disease resistant.

Campfire - One of the most exciting hardy roses every introduced. Yellow semi-double blossoms are edged in red and gradually turn to deepest pink. Matures at 3 ft high & wide
